

J. Sargeant Reynolds Community College
Course Content Summary

Course Prefix and Number: HIM 142 **Credits:** 3

Course Title: Fundamentals of Health Information Systems II

Course Description:

Continues focus of health data collection, storage, retrieval and reporting systems, with emphasis on the role of the computer in accomplishing these functions. Part II of II. Prerequisites: Passing score on the computer competency exam, ITE 115, or permission of the instructor. Lecture 3 hours per week.

General Course Purpose:

This course is designed to allow students to gain an understanding of the data elements that comprise a patient information system; to develop skills in analyzing data for completeness and accuracy; to understand the vision of the computer-based patient record (CPR) and their role in its development; to gain knowledge of the various methods for filing, storage, and retention of health records; and to develop requisite skills in the filing and storage of health records.

Course Prerequisites and Co-requisites:

Prerequisites: Passing score on the computer competency exam, ITE 115, or permission of the instructor

Student Learning Outcomes:

Upon completing the course, the student will be able to

- Discuss health care data elements and documentation standards, including documentation for inpatient, psychiatric, managed care, hospice, long-term care, and ambulatory surgery institutions;
- Apply policies and procedures for quantitative and qualitative analysis of primary health care data;
- Evaluate the accuracy of quantitative analysis;
- Evaluate and review primary and secondary health care data for institutional effectiveness;
- Apply and follow policies and procedures for data information reports by collecting, maintaining, analyzing, and displaying data based on external regulatory and accrediting agency standards;
- Employ accreditation standards for patient-related data;
- Discuss the role and purpose of the patient record;
- Evaluate appropriate user needs for computer-based patient records;
- Select and utilize appropriate technologies for computer-based patient records (storage, retention, and retrieval); and
- Construct a health record data filing system for retrieval, retention, archival storage, and destruction of health care data

Major Topics to Be Included:

- a. External regulatory agencies and accreditation standards

1. HIPAA
- b. Health care data elements and documentations standards
 1. Primary and secondary
- c. Quantitative and qualitative data analysis
- d. Computer-based patient record (CPR)
- e. Technology
- f. Health data record
 1. Filing
 2. Retrieval
 3. Retention
 4. Archival storage
 5. Destruction

Effective Date/Updated: February 15, 2019
