Connecting Devices to JSR-Public

For devices belonging to users that do not have VCCS (MyReynolds) credentials, the JSR-Public network can be used to authenticate a device via SMS text message.

Connect a Wireless Device via SMS Text Confirmation

- Connect to the JSR-Public wireless network to associate the wireless client. You may select the checkbox to 'Connect Automatically' to save this network connection for later use.

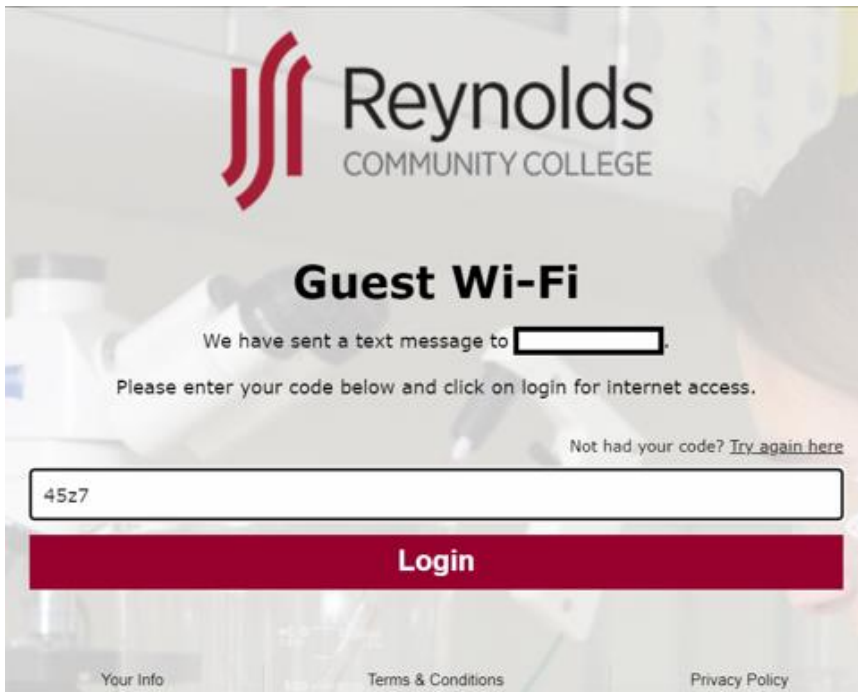

- The Reynolds captive portal will display in a webpage prompting for user credentials to continue. Please enter your mobile phone number and name after accepting the Terms and Conditions to receive a confirmation text code to continue.

- After selecting **Continue** a code will be sent via SMS text message that will need to be entered on the next screen.

Your Wi-Fi Access Code is 45z7.

Sent at 08/09/2022 15:12:07,
Expires at 08/09/2022 22:12:07.

- Select **Login** after entering the code received via text message to continue.
- Once connected to the wireless, please test:
    - Internet access
    - Email
    - VPN (laptops only)
- If issues occur, please reach out to the Reynolds helpdesk for assistance.
